

# LIDINE 2021: Light Detection In Noble Elements

Tuesday 14 September 2021 - Friday 17 September 2021

## Scientific Programme

The conference will be organized along the following tracks. Please choose at least one track during your abstract submission.

All contributions will be presented in oral format, either in-person or through remote connection. **Typical talk length is 15~20 minutes.** If you need more than that amount of time, please request in the "Comment" part during abstract submission.

**Applications (dark matter, neutrino, medical physics etc.)**

**Light/charge response in noble elements**

**Light/charge readout (PMT, SiPM, WLS, electronics etc.)**

**Detector techniques (HV, purification, cryogenics, calibration etc.)**

**Signal reconstruction and identification (analysis methods, simulations)**
